

Intermediate Level Beekeeping Course

Preparing Colonies to Survive the Winter

This course has been designed for individuals who have kept bees for at least a year and who have knowledge of beekeeping equivalent to that learned in Delaware Valley College's three day Introductory Beekeeping Course. Taught by Vincent Aloyo, Master Beekeeper and Christopher Tipping, Associate Professor of Entomology, this course focuses on how to prepare your colony for next season by undertaking proper fall and winter management. Late summer is the time to prepare for next year's harvest by installing a young vigorous queen. Colonies require sufficient stores of honey and pollen to survive the winter, and over-winter best when they are disease free and have a low varroa mite load. Students will gain hands on experience in the apiary and ample time will be allowed for discussion.

Dates: 3 Saturdays, August 6, 13 and 20, 2011

Time: 9:00 am – 4:00 pm

Place: Delaware Valley College Campus, Feldman 113

Course Number: APR 105 Section: 002

Required Equipment: Bee veil, 3-ring loose leaf binder. (Please no gloves in the apiary)

Apply Early! Class limited to 25 students

Registration: To register, fill out the form below and mail it to:

**Delaware Valley College, Continuing Education Department,
700 East Butler Avenue, Doylestown, PA 18901**
